Sample containers

The Somerset West Laboratory have a large selection of sample bottles and jars.

Please contact:

- Stewart Whyte (stewart@jones-environmental.co.za) 021 842 0071 or 0761412482
- Rachelle de Charmoy (rachel@jones-environmental.co.za) 021 842 0032 or 0726014148

These can either be collected or delivered by DHL. Please request containers at least 3 hours before you plan to collect them or before 12 noon if they are to be delivered by DHL..

Sample collections

Samples can be dropped off at Somerset West where they will be forwarded on to the UK. Please ensure they are there before 3pm so they can be collected in time for the evening flight to the UK.

DHL call at the laboratory on a daily basis and it is more cost effective to send one large consignment than several smaller ones.

Samples can also be collected by DHL for delivery to Somerset West, where they will be forwarded to the UK as above.

For large or fast turn around work we can arrange for DHL to deliver directly to the UK.

Please contact Stewart or Rachelle to arrange sample collections.

DHL account numbers

International Acc No. for samples back to UK:: **950069412**

If you do not have a pre printed DHL AWB, please tick receiver pays and put Jones UK address under receiver details. DEFRA letter must be placed on the outside of the box and a custody invoice place in the box.

Domestic Acc No. for within South Africa: **305437541**
